West Yorkshire Community Checking Events Evaluation-2024 Summary

| | | Clinic Date/s | Venue |
|----------------------------|-----|---------------|---------|
| West Yorkshire | | 2024 | Various |
| Checking results | | | |
| NUMBER OF CHECKS | 763 | % | |
| CORRECT | 280 | 36.7% | |
| MINOR ERRORS | 331 | 43.4% | |
| MAJOR ERRORS | 136 | 17.8% | |
| INCOMPATIBLE ERRORS | 16 | 2.1% | |
| TOTAL ERRORS | 483 | 63.3% | |

2024 Results Analysis

The above results are a combination of child and seat fitment. A child car seat is only correct if the child is fitted correctly in the seat *and* the seat is fitted correctly in the car. It is possible for a child to be fitted correctly and the seat to be fitted incorrectly, and vice versa. The nature of the error of fitment determines the overall error rating. As a major error is clearly more serious than a minor error; if a seat has both minor / major fitment errors, then the overall rating is classified as a major error.

763 child car seats were checked during 25 Community Checking Events. An average check rate of 31 checks per event. Out of those seats/children checked; 483 were found to be incorrectly fitted (63%). 621 children were present.

Overall, out of the seats/children incorrectly fitted, there were 331 minor errors found (69%), 136 major errors found (28%), and 16 seats were found to be either incompatible to the vehicle or child (3%). 31% of errors found were major or incompatible. Although still unacceptably high; in comparison to other regions in the UK where our experts find around two thirds of errors are classified as major or incompatible, it is an encouraging start.

| In depth analysis | Child fittings | Seat fittings |
|----------------------------|----------------|---------------|
| NUMBER OF CHECKS | 621 | 763 |
| CORRECT | 358 | 355 |
| MINOR ERRORS | 275 | 284 |
| MAJOR ERRORS | 19 | 126 |
| INCOMPATIBLE ERRORS | 22 | 6 |
| TOTAL ERRORS | 316 | 416 |

Please note: Some seats had multiple errors which explains the higher number of 'total errors' found.
